SHIPYARD : ADMIRALTY SHIPYARD 194  
 LOCATION : LENINGRAD, USSR  
 GEO COORDS: 59-55N 030-17E

25X1

## KEY TO ANNOTATIONS

1. SOFIYA Class Tanker alongside fitting-out quay (LOA approx 750').

25X1

2. Unidentified vessel alongside quay (LOA approx 320').

This vessel appears similar to the one seen in this position

25X1

25X1

Two vessels are moored outboard of this vessel (see annotation 3, below).

3. Two unidentified probable vessels (approx LOA of each not more than 320').  
 These vessels are moored outboard of a third vessel (annotation 2, above). Imagery resembling possible gangplanks appears to extend from bow and stern of the vessel at the quay to the bow and stern of the outboard vessel.

4. Possible BOLVA Class APL in slip (LOA approx 360').  
 Identification is based upon vessel shape, and a proportional analysis of topside detail resembling the superstructure levels and possible ventilators on the BOLVA. A possible BOLVA Class APL was observed in this position

25X1

25X1

5. Unidentified vessel in slip (LOA approx 240').  
 This vessel appears similar to a possible ZEYA Class YRSN observed in this position

25X1

25X1

All the vessels in this slip occupy the same positions as the BOLVA Class APL, the ZEYA Class YRSN and two smaller vessels just east of the ZEYA

25X1

25X1

6. Possible ANDREY ZAKHAROV Class Fish Cannery Ship in fitting-out basin (LOA approx 530').  
 One superstructure at either end with no superstructure amidship equate to the basic recognition features of this class.

7. Possible DOBRYNA NIKITICH Class Icebreaker (LOA approx 225'). Rounded hull outline and superstructure just forward of amidships contribute to this evaluation. 
8. Possible barge (LOA approx 300').
9. Unidentified vessel in water across the foot of the building ways (LOA approx 530'). This ship has a superstructure well forward and a long clean area amidships similar to the ANDREY ZAKHAROV Class Fish Cannery Ship; however, no stern superstructure can be discerned on this poor quality photography. This vessel was not observed at the shipyard on the previous mission. A possible crane is located amidships along the outboard (port) side of this ship.
10. Unidentified vessel under construction on building way (visible extent of construction approx 650'). It cannot be ascertained if a ship is in the initial stage of construction on the adjacent (northern) way. 
11. Unidentified craft alongside possible construction hall (could not be measured).
